DATA ANALYTICS AND DATA ENGINEERING

Data Analyst with approximately two years of experience, including an internship, in financial analytics, corporate data integration, and automation. Works with Python, SQL, ETL, Power BI, and DAX to deliver financial KPIs and semantic models. Develops components of internal analytics applications and maintains a public portfolio of reproducible analytics, data-quality, and PySpark/Delta Lake studies.

PROFESSIONAL EXPERIENCE

Baumer S.A. | Mogi Mirim, Brazil

Junior Data Analyst, Controlling Jul 2025 - Present

- Integrate Controlling, Finance, Billing, HR, and Production data using Python (pandas) and SQL, building and maintaining ETL workflows and data-quality checks.
- Build Power BI semantic models and DAX dashboards for margins, expenses, P&L, and business-unit results, using calculation groups, YTD analysis, and rolling averages.
- Support month-end closing, budgeting, and forecasting through cost and variance analysis, presenting findings to management.
- Translate business requirements into KPIs, reports, and workflow automations using Excel, Power Apps, and Power Automate.
- Developed components of a Corporate Results Hub using Python, FastAPI, and SQLite, integrating KPIs, financial data, and drill-down analysis.

Data Analysis Intern Nov 2024 - Jul 2025

- Consolidated cross-functional datasets and supported Python/SQL pipelines, KPI documentation, data validation, and recurring report automation.

O Pescador de Ofertas | Mogi Mirim, Brazil

E-commerce Assistant Jan 2024 - May 2024

- Analyzed orders, invoices, shipping, and SLAs using SQL, Excel, and an internal Python tool integrated into ERP operations.

PERSONAL PROJECTS WITH SYNTHETIC DATA

- Lakehouse and pipelines | Python/SQL, PySpark, and Delta Lake study with Bronze/Silver/Gold layers, Delta persistence, and idempotent reruns validated in GitHub Actions.
- Sales and margin analytics with SQL | 600 synthetic orders over six months; window functions, revenue, gross profit, weighted margin, and an interactive web dashboard.
- Data quality | 670 synthetic records: 600 accepted and 70 quarantined; schema, duplicate, and domain checks with rerun tests.

TECHNICAL SKILLS

Data and integration: Python (pandas, NumPy), SQL, ETL/ELT, APIs, FastAPI, SQLite, Git, and data quality.

BI and business: Power BI, DAX, semantic models, DAX Studio, Tabular Editor, advanced Excel, KPIs, P&L, costs, budgeting, and forecasting.

Personal projects: PySpark, Delta Lake, Bronze/Silver/Gold layers, tests, and GitHub Actions.

Knowledge: Databricks, Azure Data Lake, AWS (EC2, S3, RDS), Microsoft Fabric, SQL Server, dimensional modeling, and Power Query.

EDUCATION AND CERTIFICATIONS

FATEC Mogi Mirim Arthur de Azevedo | Undergraduate Technology Degree in Systems Analysis and Development (Tecnólogo) | expected Dec 2026

ETEC Pedro Ferreira Alves | Technical Diploma in Internet Computing | Dec 2023

Microsoft Certified: Fabric Analytics Engineer Associate (DP-600); Microsoft Certified: Power Platform Fundamentals (PL-900); DataCamp Data Analyst Associate.

Additional coursework: Databricks, Azure Data Lake, and AWS including Amazon EC2.

Native Portuguese; fluent English, TOEIC 910/990 (2024); intermediate Italian.
